(54) FOAMED PULP SHEET AND ITS PRODUCTION

(57)Abstract:

PURPOSE: To provide a sheet which has cushioning properties and can be easily incinerated and used for landfill after use.

CONSTITUTION: A foamed pulp sheet is produced either by mixing pulp contg. a reclaimed pulp, a biodegradable thickener, a thermally decomposable blowing agent, and water, forming the resulting mixture into a sheet, heating the sheet to give a foamed sheet, and drying it, or by vigorously agitating pulp contg. a reclaimed pulp, water, and a surfactant to give a frothed mixture, molding the foam into a sheet, and drying it.

## LEGAL STATUS

[Date of request for examination]

18.06.1999

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

3278922

[Date of registration]

22.02.2002

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
